DATUM

Dear Ladies and Gentlemen,

as known to you, it is possible that within the Volkswagen Group, in the case of insufficient Delivery- and Product Quality, following a pre-defined Escalation Procedure with participation of the Management of the affected suppliers (Top-Q Meeting), a downgrading of the Quality Performance to a "C Grade", will take place.

Linked to this, is the status "Business on Hold". With this status there are no further Nominations possible for the affected Production Site.

From a pro-active point of view, we would like to inform you that for the Suppliers to the Volkswagen Group, the ISO/TS 16949, requires the supplier to unsolicited inform the appropriate Certification Authority immediately of their status "Business on Hold".

According to the requirements of the ISO/TS 16949, and the implementation rules per "Automotive Certification Scheme for ISO/TS16949:2002", the Certification Authority can, based on the proven Customers dissatisfaction, start a Witness Audit or the De-certification process.

This letter has no reference to your actual Quality Performance but is a preventive measure toward all Suppliers of the Volkswagen Group.

With kind regards
